## CURRENT OPPORTUNITY

Title: **Junior Implementation Developer**

Employment Type: **Full-time**

Experience: **Entry to Intermediate**

### **Join a dynamic team, focused on helping Municipal Governments “Advancing Government. Engaging Citizens.”**

We are a software and service company with the goal of being an Alberta-based technology company recognized across North America. We are a small team that has seen year-over-year growth and is well positioned to increase our breadth and depth within the niche rural and small urban markets. We are looking for top-talent team members who can help take us to the next level.

### **About Catalis Canada**

Catalis Canada is a fast-growing and award-winning technology company that serves small urban and rural municipal governments across North America. We offer competitive compensation, a hybrid work policy, full paid vacation, and comprehensive health & dental benefits. We focus a lot of energy on professional development as we want our employees to ride the wave and grow with our business. We strive to be an example of a successful high-growth technology company in Alberta, and our team members depend on each other to make it happen. This opportunity is based at Catalis Canada’s office located in Old Strathcona (Edmonton, Alberta). Our new (and expanding) office includes an innovative vibe with stand-up desks for all staff, foosball, ping pong, board games, an active social committee, fitness challenges, a rooftop patio, Peloton bike, and more!

### **Position Overview**

- Work with the development and implementations team to convert data from various systems into Catalis software databases/formats
- Perform data conversions for new customer implementations as well as a variety of data-related tasks for new and existing customers
- Working Closely with the Project Manager and Implementation team to ensure client data is transferred as accurately and fully as reasonably possible
- Develop tools that can be used by other team members to streamline the onboarding process, reduce errors, and decrease time to value
- Communicate with clients previous software providers, where necessary, to ensure we are best delivering service to our clients
- Develop data mapping documentation and time estimates for data conversion projects
- Subject matter expert on the functionality of the software related to the data structure and data requirements
- Ensure that project tasks within the scope of this role will be delivered according to timelines, as determined by the project team
- Maintain current knowledge and awareness of industry best practices, tools, and other technical skills related to the position

---

**Position Requirements.**

- Bachelor's degree or diploma in computer science, engineering, computer information science, information technology, or a related field.
- Previous experience in C# considered a strong Asset
- Expert or advanced skills in MS-SQL
- Ability to write data conversion scripts and perform complex queries
- Excellent troubleshooting skills and analytical thinking to resolve issues
- Proficiency in all Microsoft Office applications and SQL database management systems.
- The ability to multitask effectively.
- The ability to work independently and as part of a team.
- Strong analytical and problem-solving skills.
- Excellent organizational and time management skills.
- Detail-oriented.
- Experience with Local Government software is an asset.
